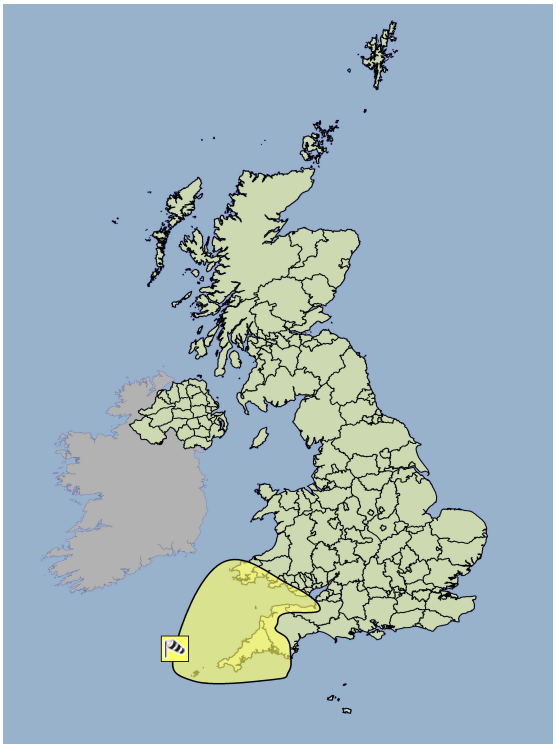
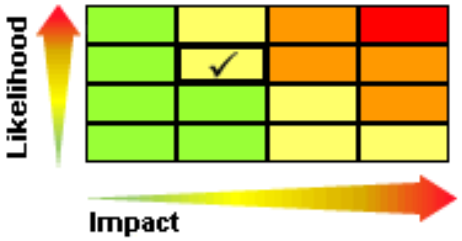
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of low pressure will move eastwards across northern Britain on Saturday. As it does so, a swathe of very strong westerly winds will cross southwest England and southern and southwestern parts of Wales during the second half of Saturday. In addition, some heavy blustery showers are likely. The exact extent of the strongest winds remains somewhat uncertain and the public are advised to monitor the website for possible updates.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **14:00 on Sat, 10th May 2014** until **23:55 on Sat, 10th May 2014**

Gale force westerly winds are likely to affect parts of southwest England and south and west Wales on Saturday afternoon and evening giving gusts of 50 to 60 mph. The public should be aware that this could lead to difficult driving conditions and perhaps some disruption to outdoor activities.

This warning has been updated to include parts of Wales, with other details unchanged.
